QUALITY, HEALTH, SAFETY, AND ENVIRONMENT POLICY

With our quality approach and commitment to society, our employees, stakeholders, and the environment, we invest in people, knowledge, and technology to achieve zero-defect production/services and zero occupational and environmental accidents. With this belief, we commit to:

✓ Complying with all legislation, administrative regulations, legal responsibilities, and standards related to Health, Safety, and Environment,
✓ Adopting the principles of sustainability in all our activities from environmental, social, and economic perspectives, as well as the 10 principles of the Global Compact,
✓ Producing the most innovative, functional, practical, and solution-oriented products to enhance consumers' enjoyment of their living spaces, and offering these products at the most affordable prices, with easy accessibility and clear application instructions,
✓ Minimizing the health, safety, and environmental impacts of the technology, raw materials, and auxiliary materials we use, and taking the necessary precautions for process safety,
✓ Ensuring a shared perspective across all levels of our organization in line with our Quality, Health, Safety, and Environment requirements,
✓ Providing training and open communication opportunities to all our employees, stakeholders, and contractors to secure our continuous development,
✓ Delivering high-quality products and services that meet existing and evolving consumer needs and expectations, do not harm the environment, nature, or human health, and improve their quality of life,
✓ Collaborating with our suppliers and customers based on a win-win principle, fostering trust and cooperation,
✓ Continuously improving all processes within the scope of our management system,
✓ Progressing by considering the impacts of climate change in all stages of our products and services.
