ENERGY MANAGEMENT POLICY

Polisan Kansai Boya aims to implement and enhance proactive energy management systems within the framework of sustainability principles in its production and service activities. To ensure effective energy management, we commit to:

✓ Complying with all legal and other applicable requirements related to energy management processes,

✓ Continuously reviewing our performance based on energy performance indicators, managing risks and opportunities effectively, and improving all processes in line with the principle of continuous improvement,

✓ Ensuring the provision and optimal utilization of sufficient human, technological, and financial resources to achieve our objectives and targets,

✓ Conducting awareness-raising activities, particularly for our employees and all relevant stakeholders, regarding the reduction of natural resource consumption, minimization of energy losses, and promotion of clean energy use,

✓ Being sensitive to climate change and taking the necessary precautions,

✓ Preferring energy-efficient technologies and practices in all our production, supply chain, and service processes,

✓ Monitoring energy aspects and developing new projects to reduce consumption levels,

✓ Considering energy-efficient designs that support the transition to a low-carbon economy in our investments.
